

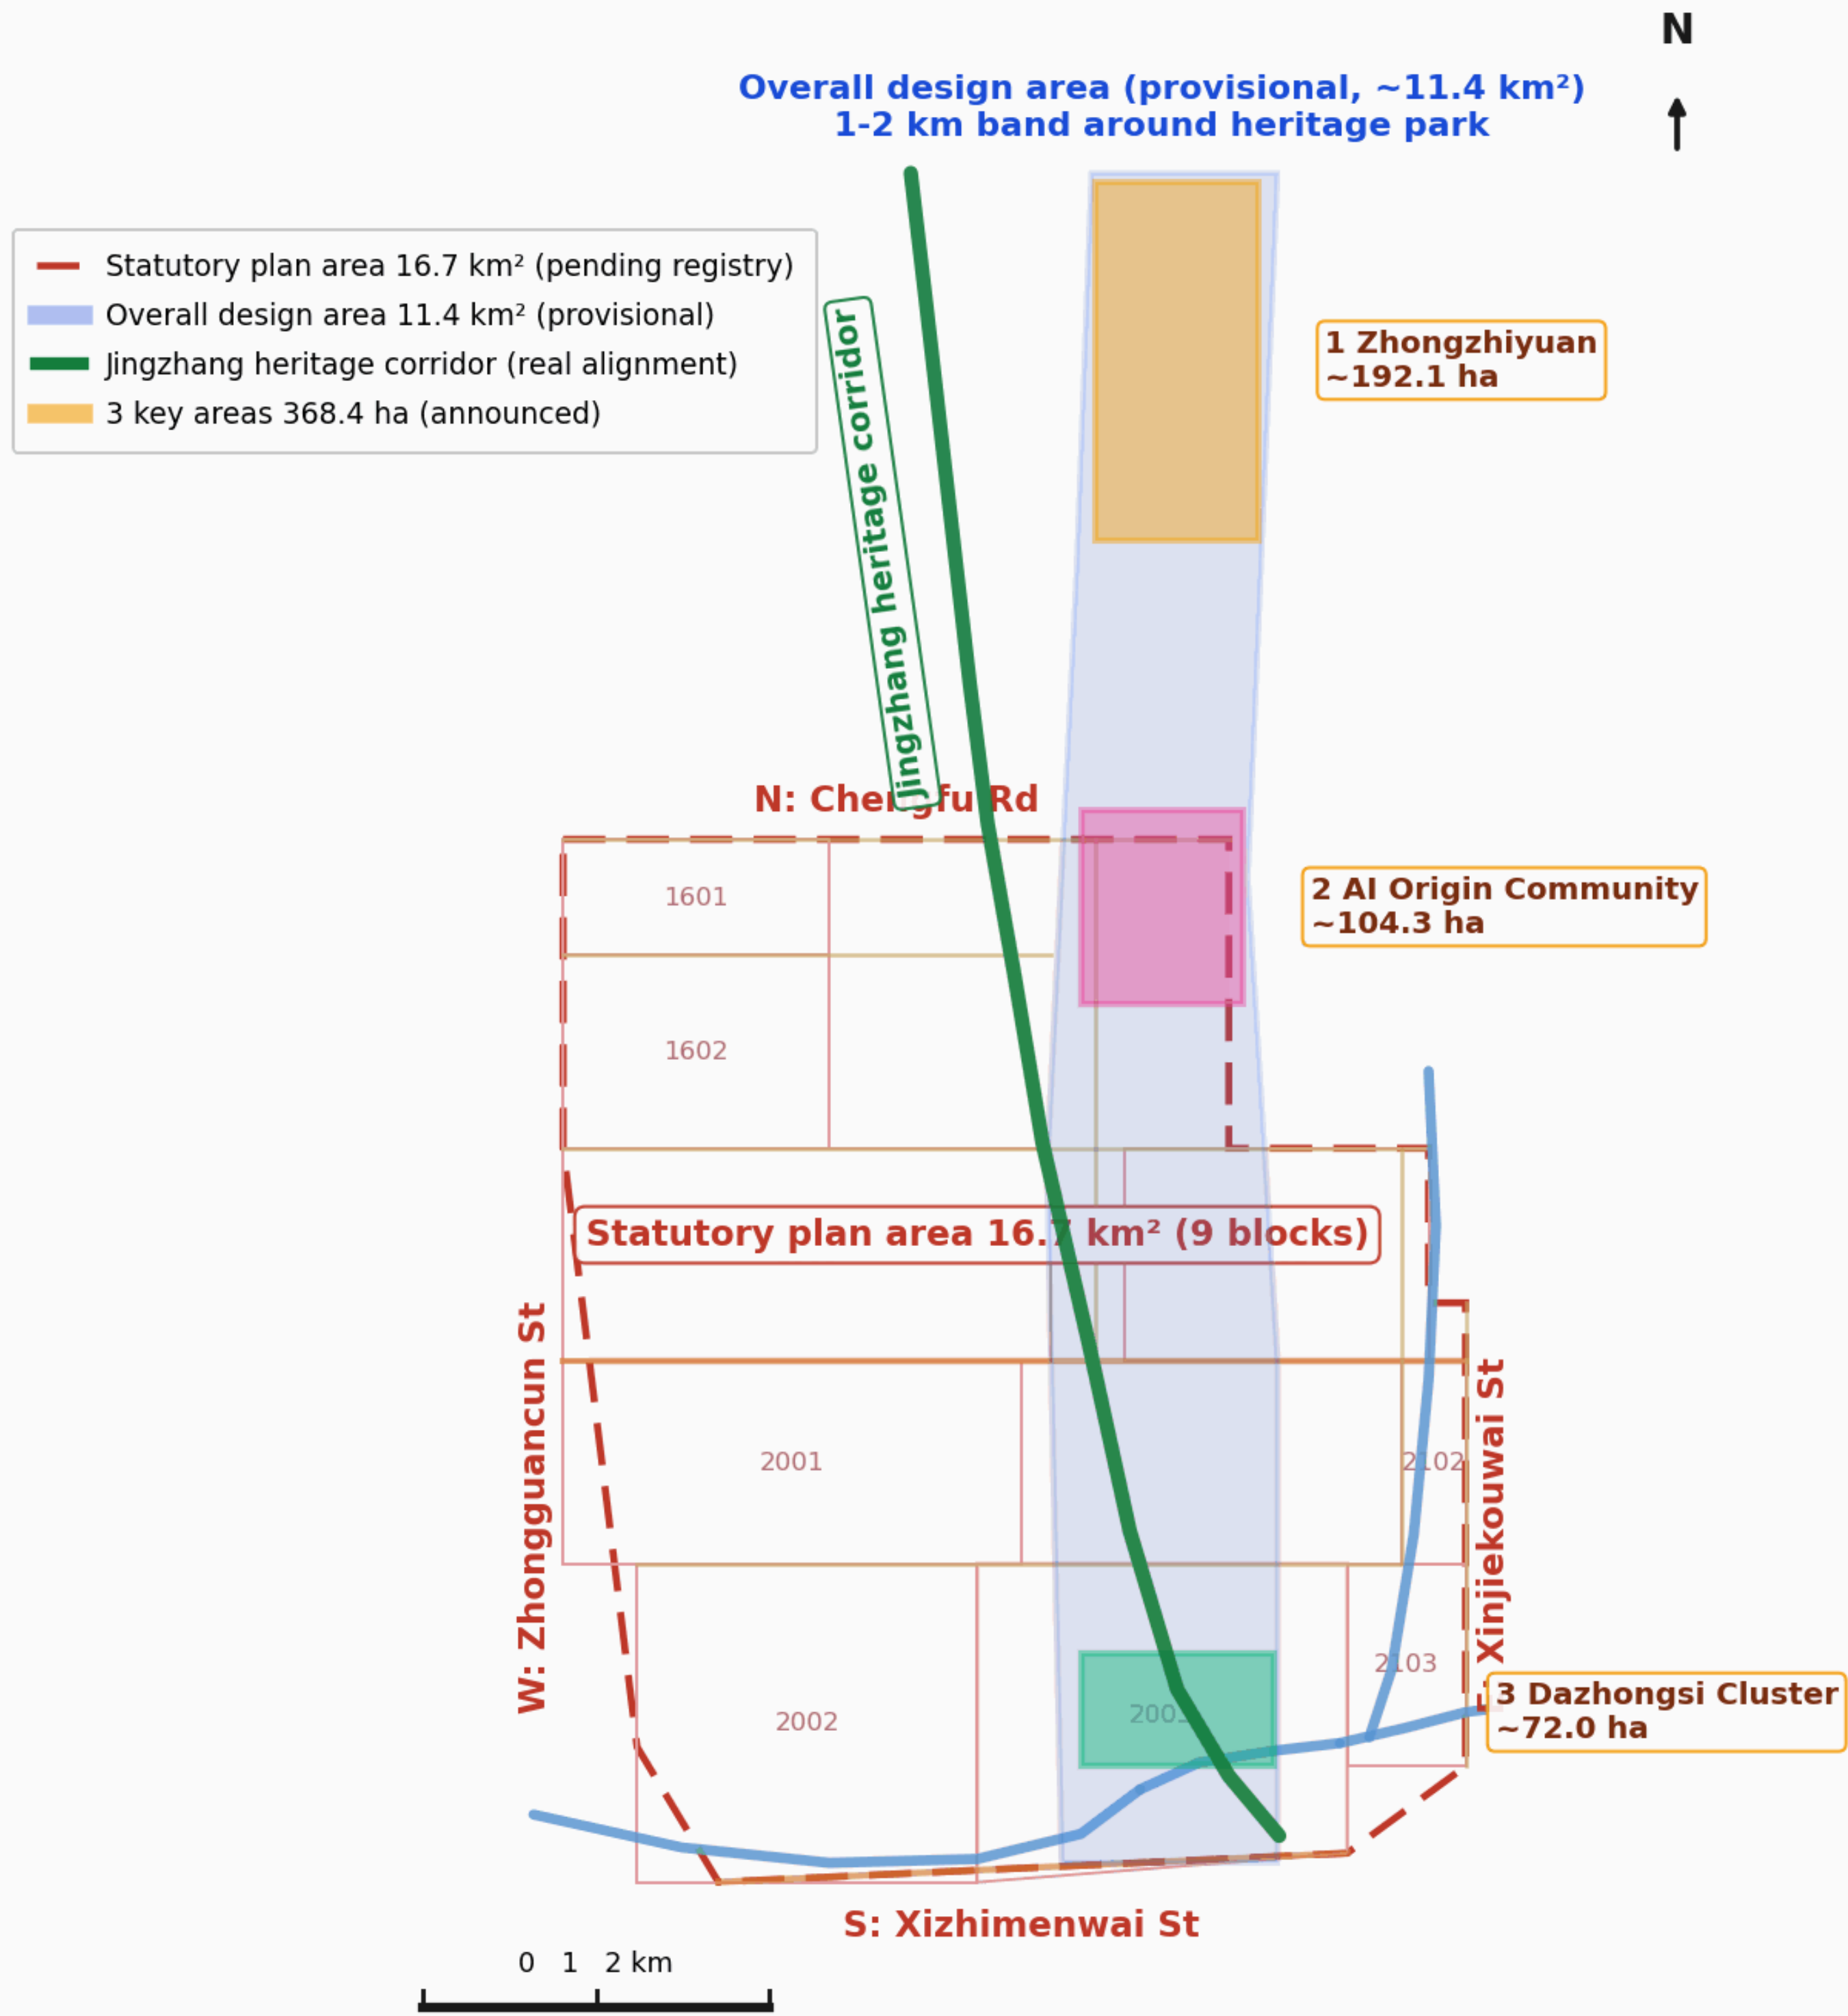

Fig. 1 Overall Scope: Statutory Plan (pending registry) × Announcement × Evidence

Base redrawn schematically from statutory plan maps (participant-submitted, pending registry); areas per plan text

Evidence chain (statutory-pending registry → derived → schematic)

Statutory clauses (participant-submitted, pending registry)

- Plan area 16.7 km², 9 blocks (Art. 2)
- Floor area ≤ 24.08M sqm (Arts. 7/13)
- Pop 364k · Jobs 397k (Art. 7)
- 75 zones · 6 height classes (Arts. 12/16)
- 13 immovable heritage sites (Art. 26)

Announced (medium)

- Overall design area ~11.4 km² (provisional)
- 3 key areas 368.4 ha (192.1+104.3+72.0)
- Study area 43.6 km² covers plan 16.7 km²

Schematic recalc (low, to be redone)

- Green 12.3% · public space 7.3%
- Footprint 311k sqm (scaffold geometry)
- All layers recalc after official release

43.6 km²

Coordinated study (brief)

16.7 km²

Statutory plan (9 blocks)

~11.4 km²

Overall design (provisional)

24.08M sqm

Statutory floor-area cap

7

Time-space fold nodes

10

AI urban scenarios

Provisional geometry is for intake/visualization only, not official redlines; statutory and policy files cited are participant-submitted, pending source-registry review (direct URLs and document numbers in sources.json); official redlines prevail on release. Tier-3 performance metrics (30% adaptive space, 60% covenant coverage) are design targets, not measured results.

How to read this sheet

1 Three boundary colors

Red dashed = statutory plan 16.7 km² (9 blocks); blue = provisional design area ~11.4 km²; green = the 1–2 km corridor along the heritage park (true alignment).

2 Evidence chain

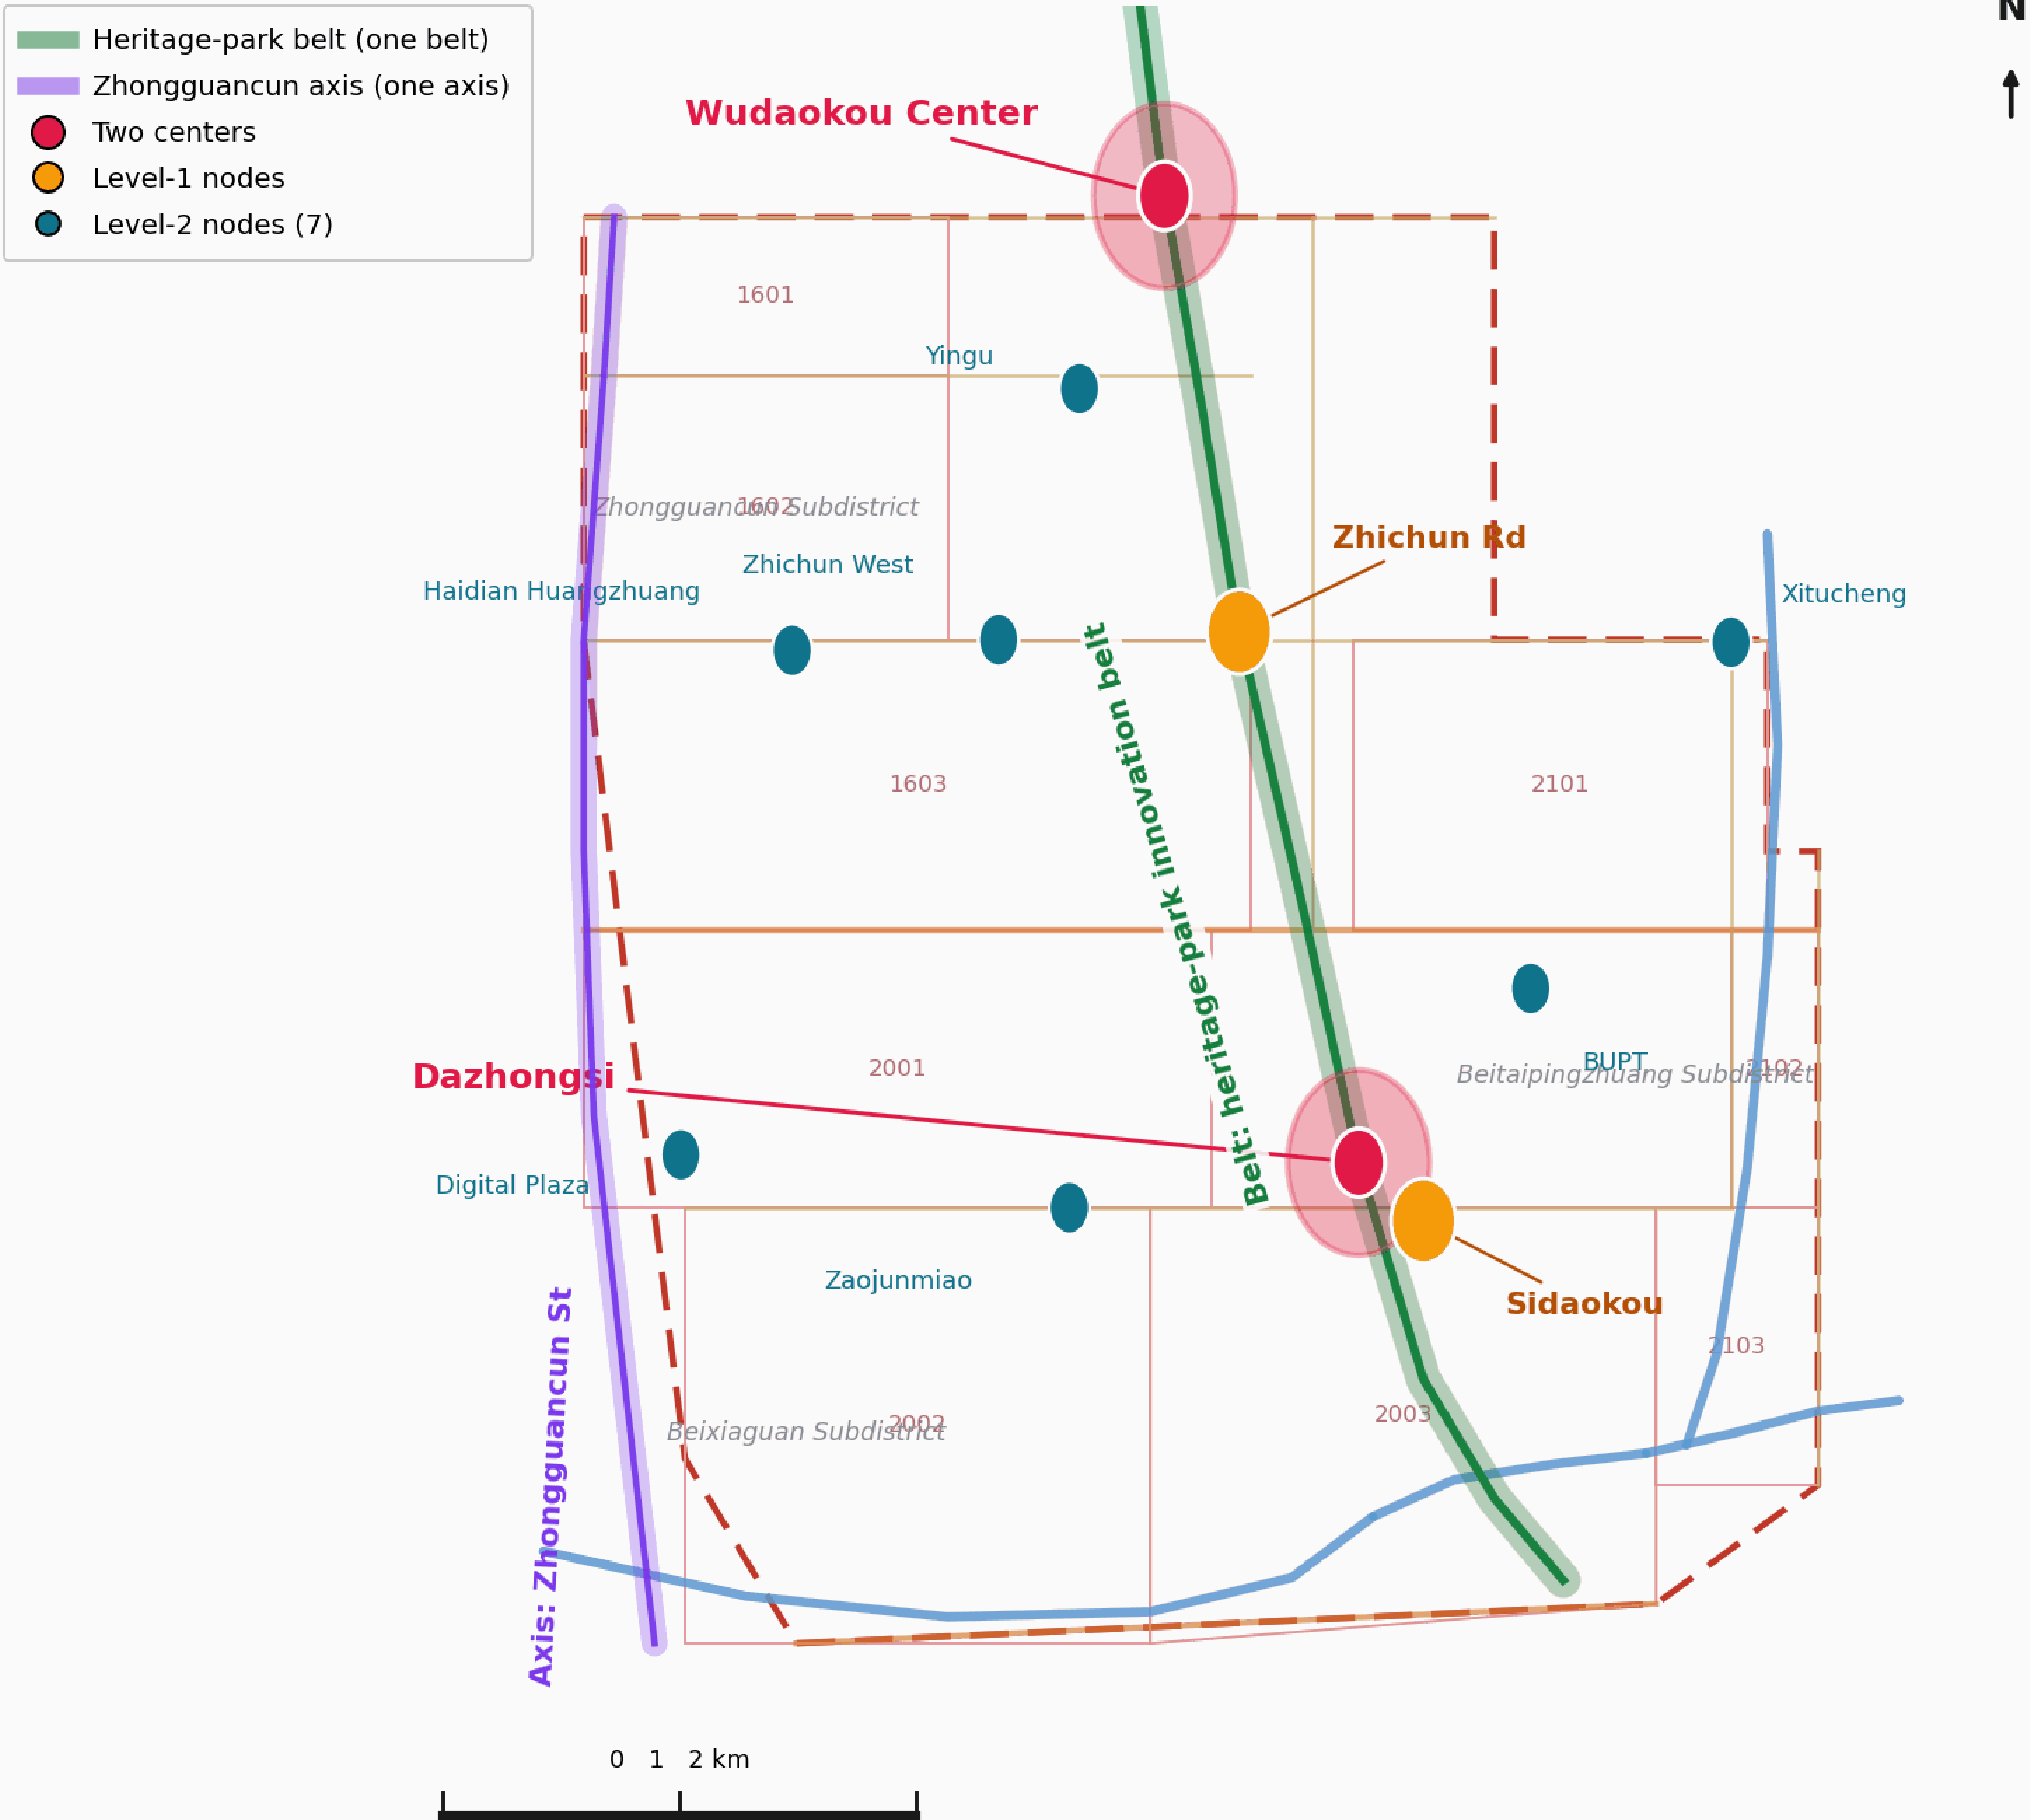

Green = statutory clauses (pending registry review), orange = brief figures (medium confidence), grey = illustrative recalculation; values match the text and metrics.json.

3 Three key areas

192.1 ha + 104.3 ha + 72.0 ha = 368.4 ha (brief figures; provisional geometry).

Fig. 2 Spatial Structure: One Belt, One Axis, Two Centers, Nodes (Art. 9)

Structure redrawn schematically from the statutory spatial-structure map

4.20M sqm

Wudaokou Ctr · 19.9%

3.80M sqm

Dazhongsi Ctr · 18.0%

5.20M sqm

Heritage belt · 24.7%

7.88M sqm

Other 8 blocks · 37.4%

Scenario allocation (illustrative, not a commitment): four mutually exclusive zones within the statutory area total 21.08M sqm, within the 24.08M sqm cap; Xuebei yuan 3.0M sqm sits outside the statutory 16.7 km² area and is excluded from the cap.

How to read this sheet

1 One belt, one axis

Belt = heritage-park industrial innovation belt (green); axis = Zhongguancun Street innovation axis (purple); redrawn from the statutory structure map.

2 Two centers, nodes

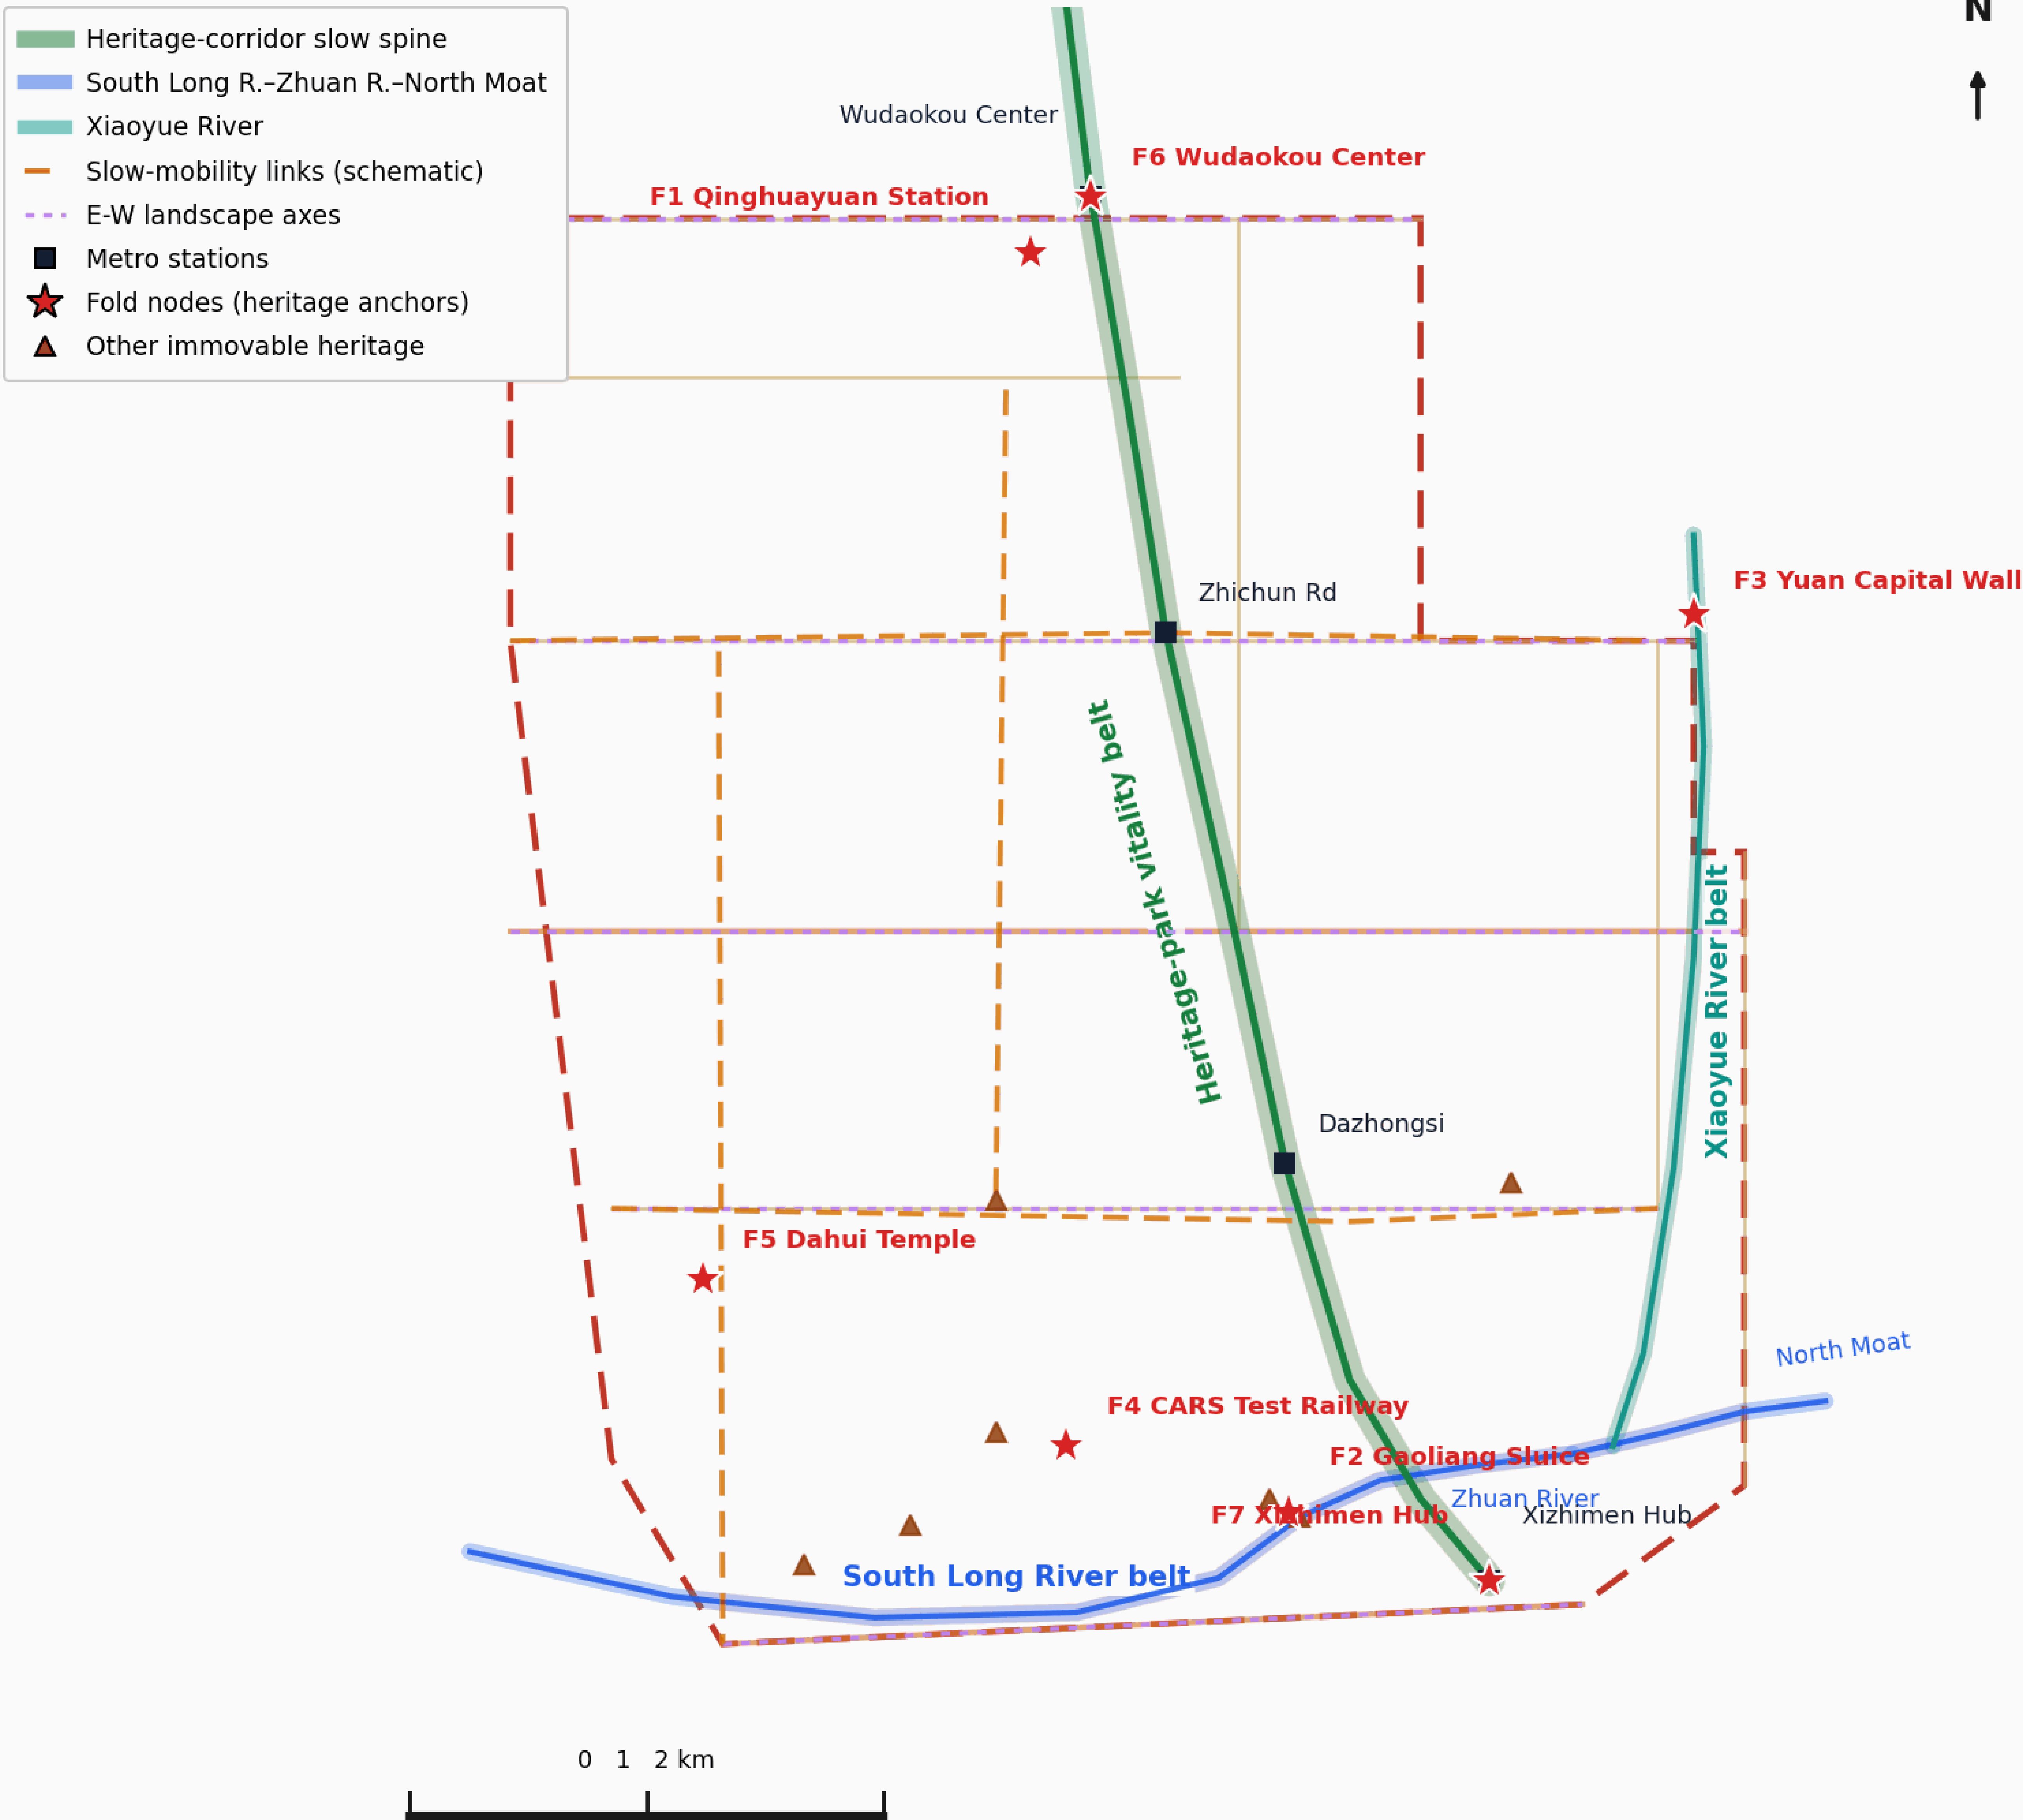

Centers = Wudaokou & Dazhongsi (red); tier-1 nodes = Zhichunlu & Sidaokou (orange); 7 tier-2 nodes (blue) sit along belt and axis by block.

3 Statutory basis

Structure follows HD00-1601 Art. 9 (participant-submitted, pending review); block edges are illustrative; official redlines prevail.

Fig. 4 Mobility × Blue-Green × Fold Nodes (Arts. 17/27/29/30/52)

Water/greenways redrawn from statutory blue-green maps; fold nodes at real Art. 26 heritage positions; purple dashed = five E-W landscape axes of the statutory six-axis structure

Slow mobility

Trails & cycle feeders

AI+06 transit

On-demand, 9-point governance

Blue-green

Qinghe-Xiaoyuehe-park

F1-F7

Zero physical intervention

Before any AI+06/09/10 field pilot: data-protection/ethics impact assessment, participatory accessibility testing, safety validation, public notice and independent professional sign-off; all performance figures are targets pending trial.

How to read this sheet

1 Slow-mobility spine

Trails and cycleways form a spine along the heritage corridor with fishbone feeders into side blocks; fold nodes F1-F7 anchor heritage with zero physical intervention.

2 Blue-green network

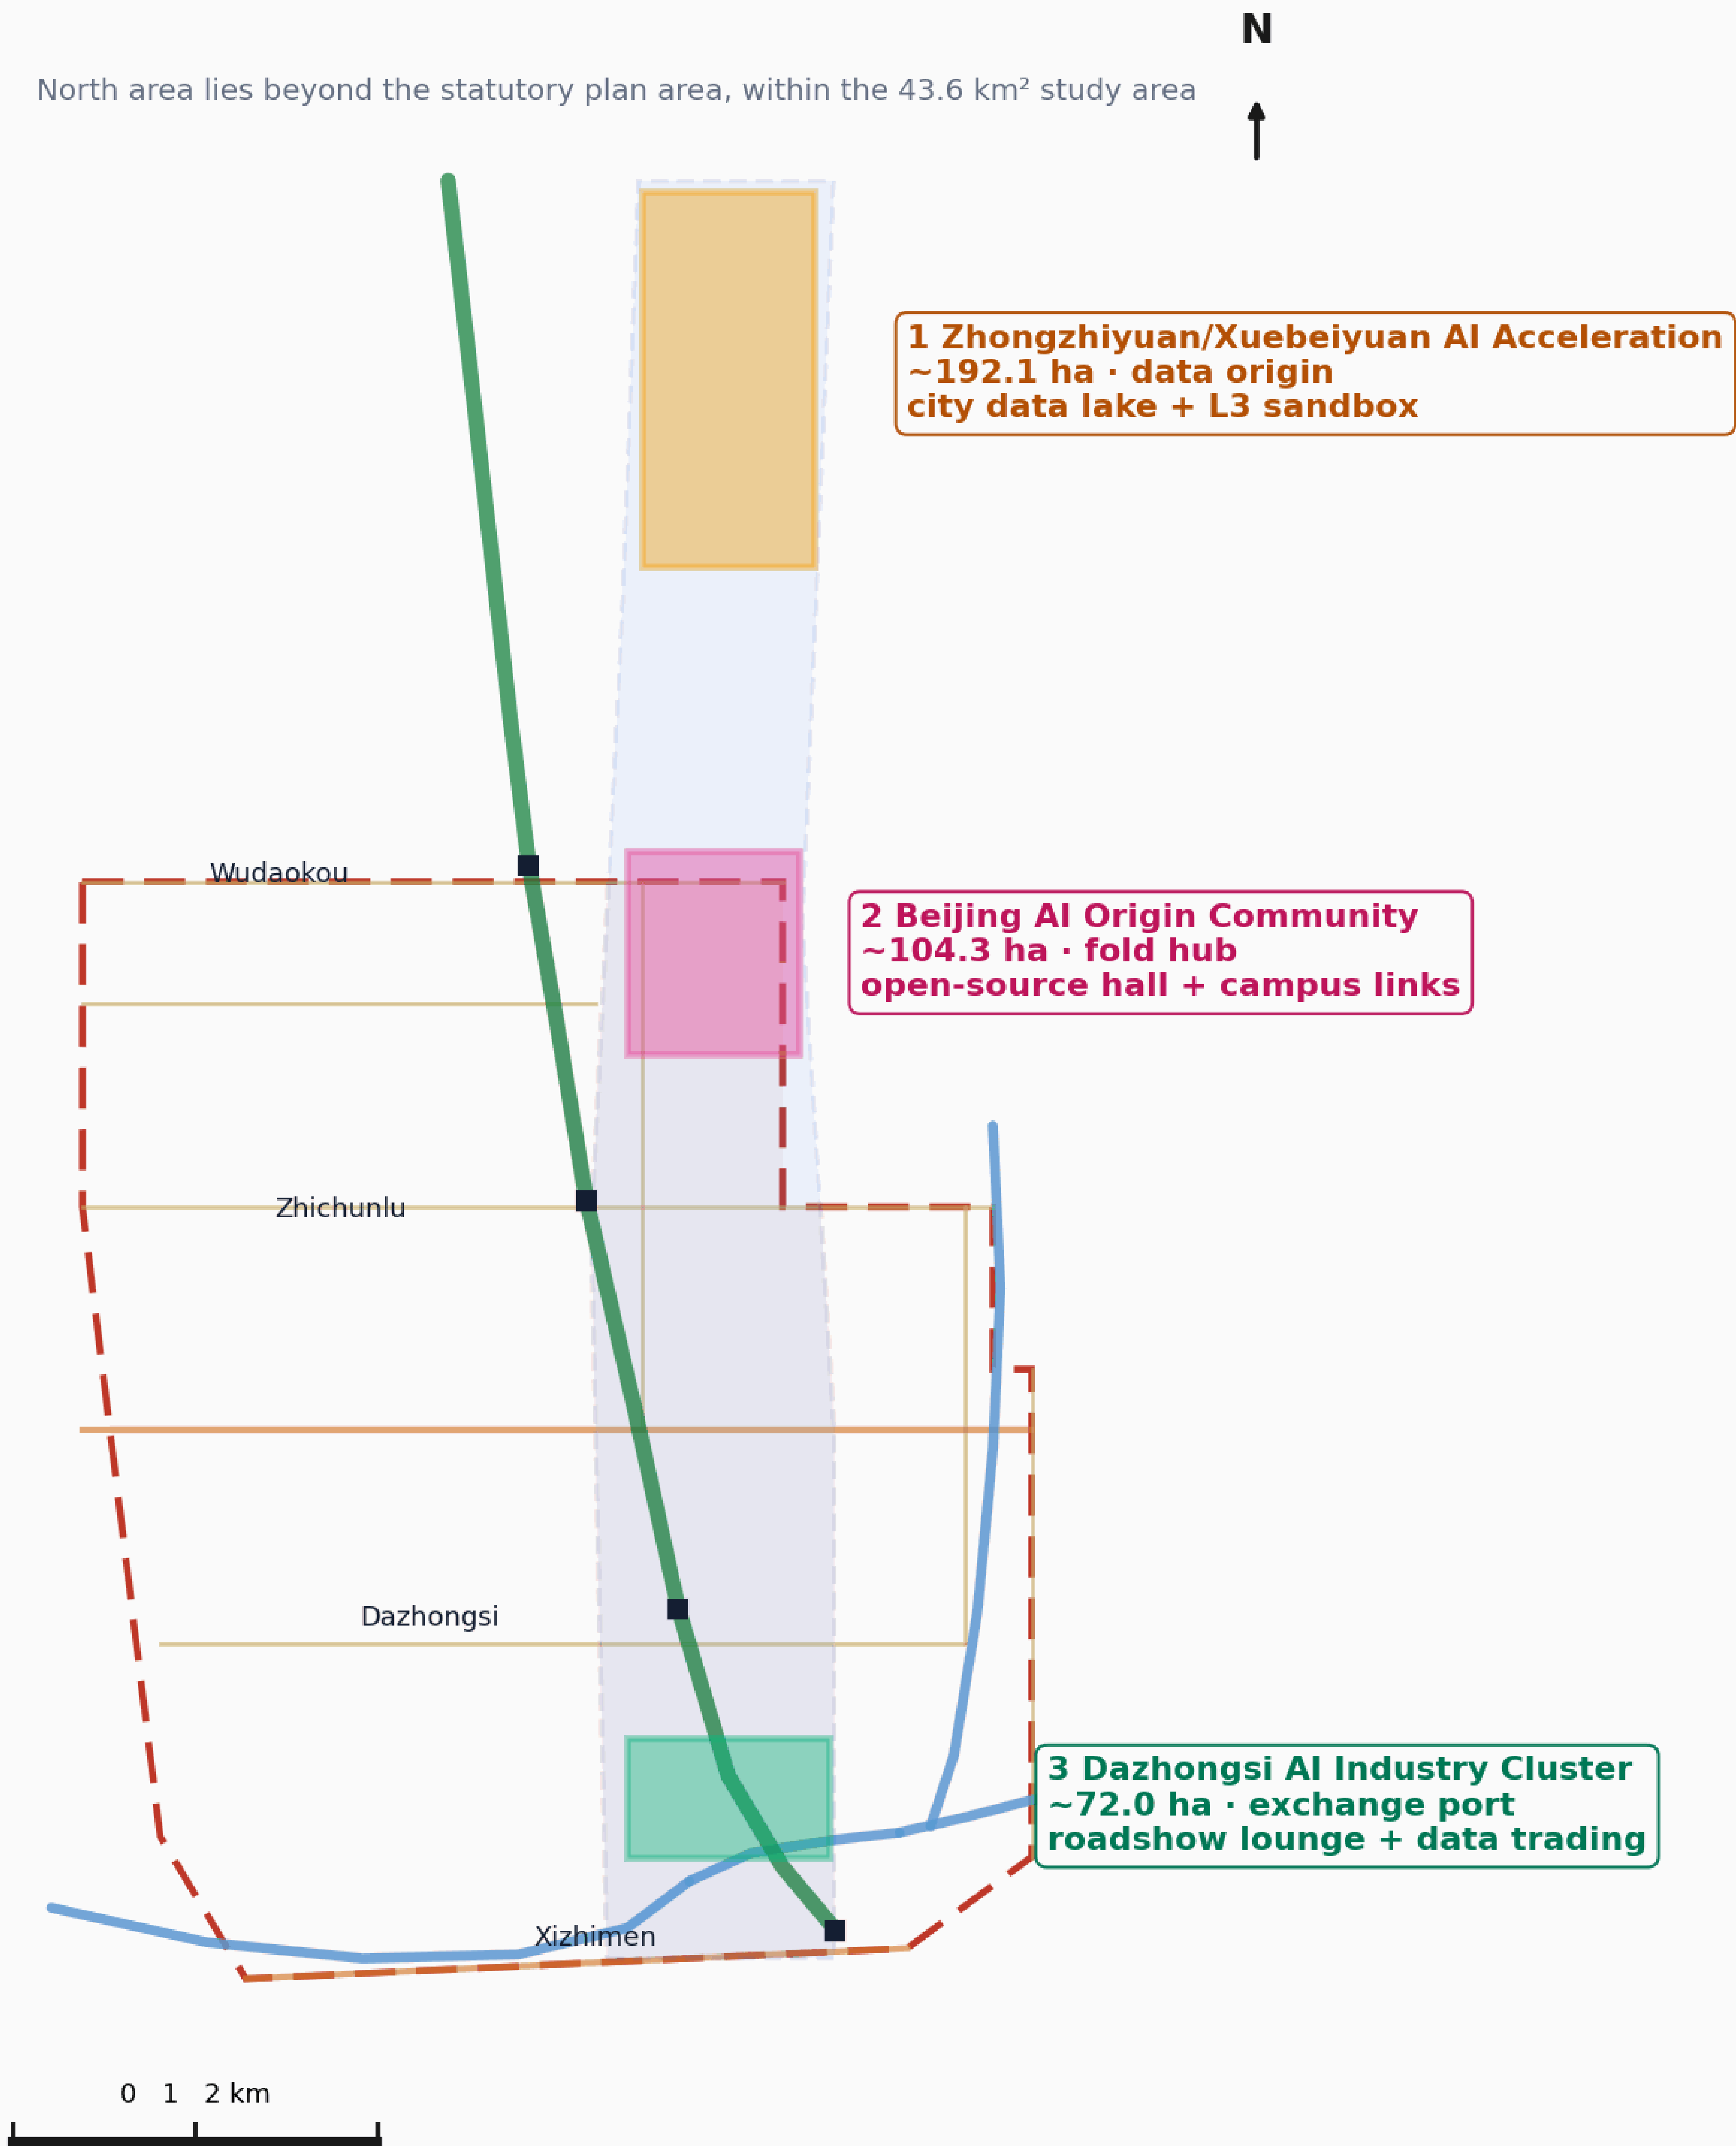

Qinghe River-Xiaoyuehe River-heritage park corridors run through; AI+06 on-demand transit supplements (never replaces) fixed lines; offline equivalents kept.

3 AI+06 governance

9 control points (no line cuts, no surge pricing, no individual biometric intake) are enforced via the governance table; performance figures are targets pending trial.

Fig. 3 Three Key Detailed-Design Areas (announced 368.4 ha, provisional)

Key areas are provisional polygons per announcement; positions per official release

Key Area 1

Wudaokou origin community

Key Area 2

Dazhongsi station-city

Key Area 3

Heritage-park belt

Key-area geometry is provisional; areas and metrics will be recalculated on official KEY_AREA release, with a version-change record keeping both geometries, coordinate systems and diffs.

How to read this sheet

1 Three key areas

Wudaokou origin community, Dazhongsi station-city integration, heritage-park innovation belt; geometry provisional, positions illustrative.

2 Metrics basis

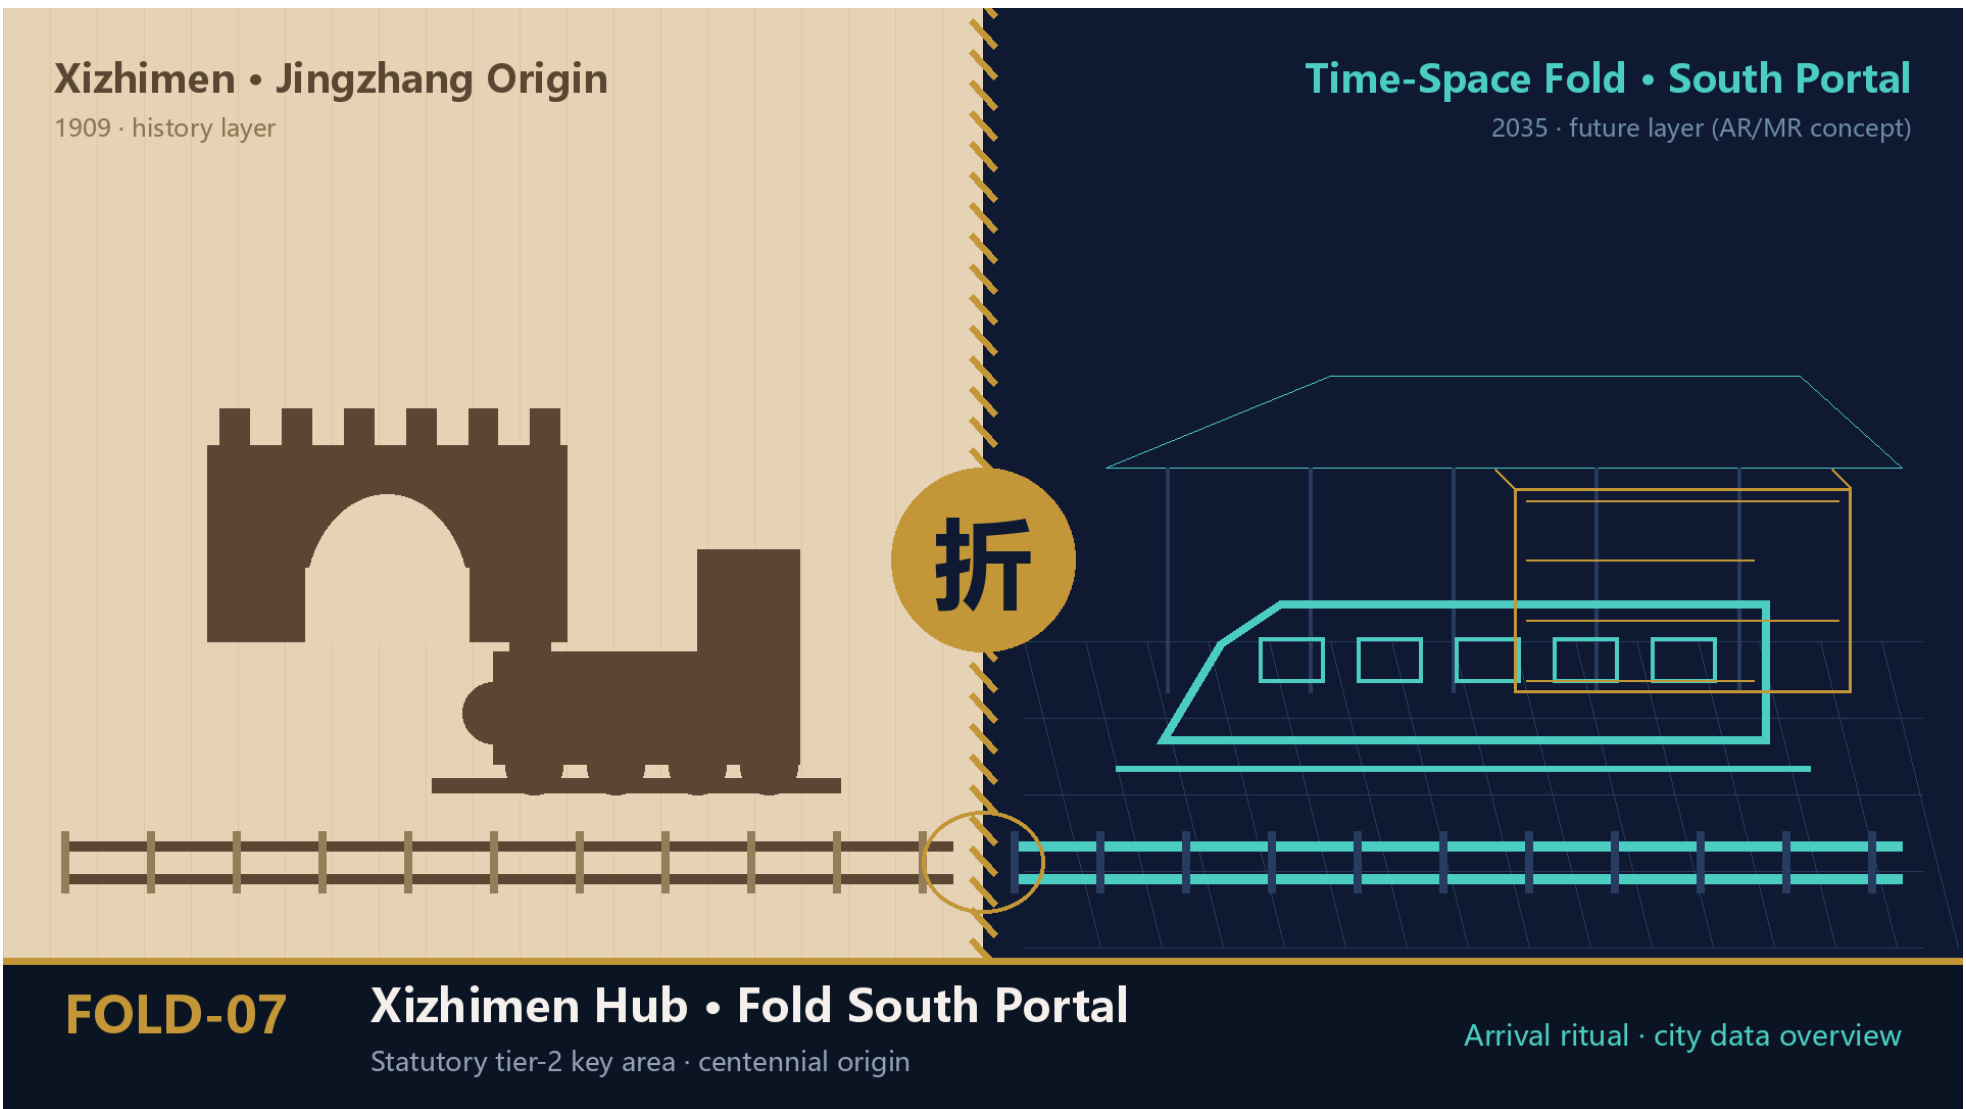

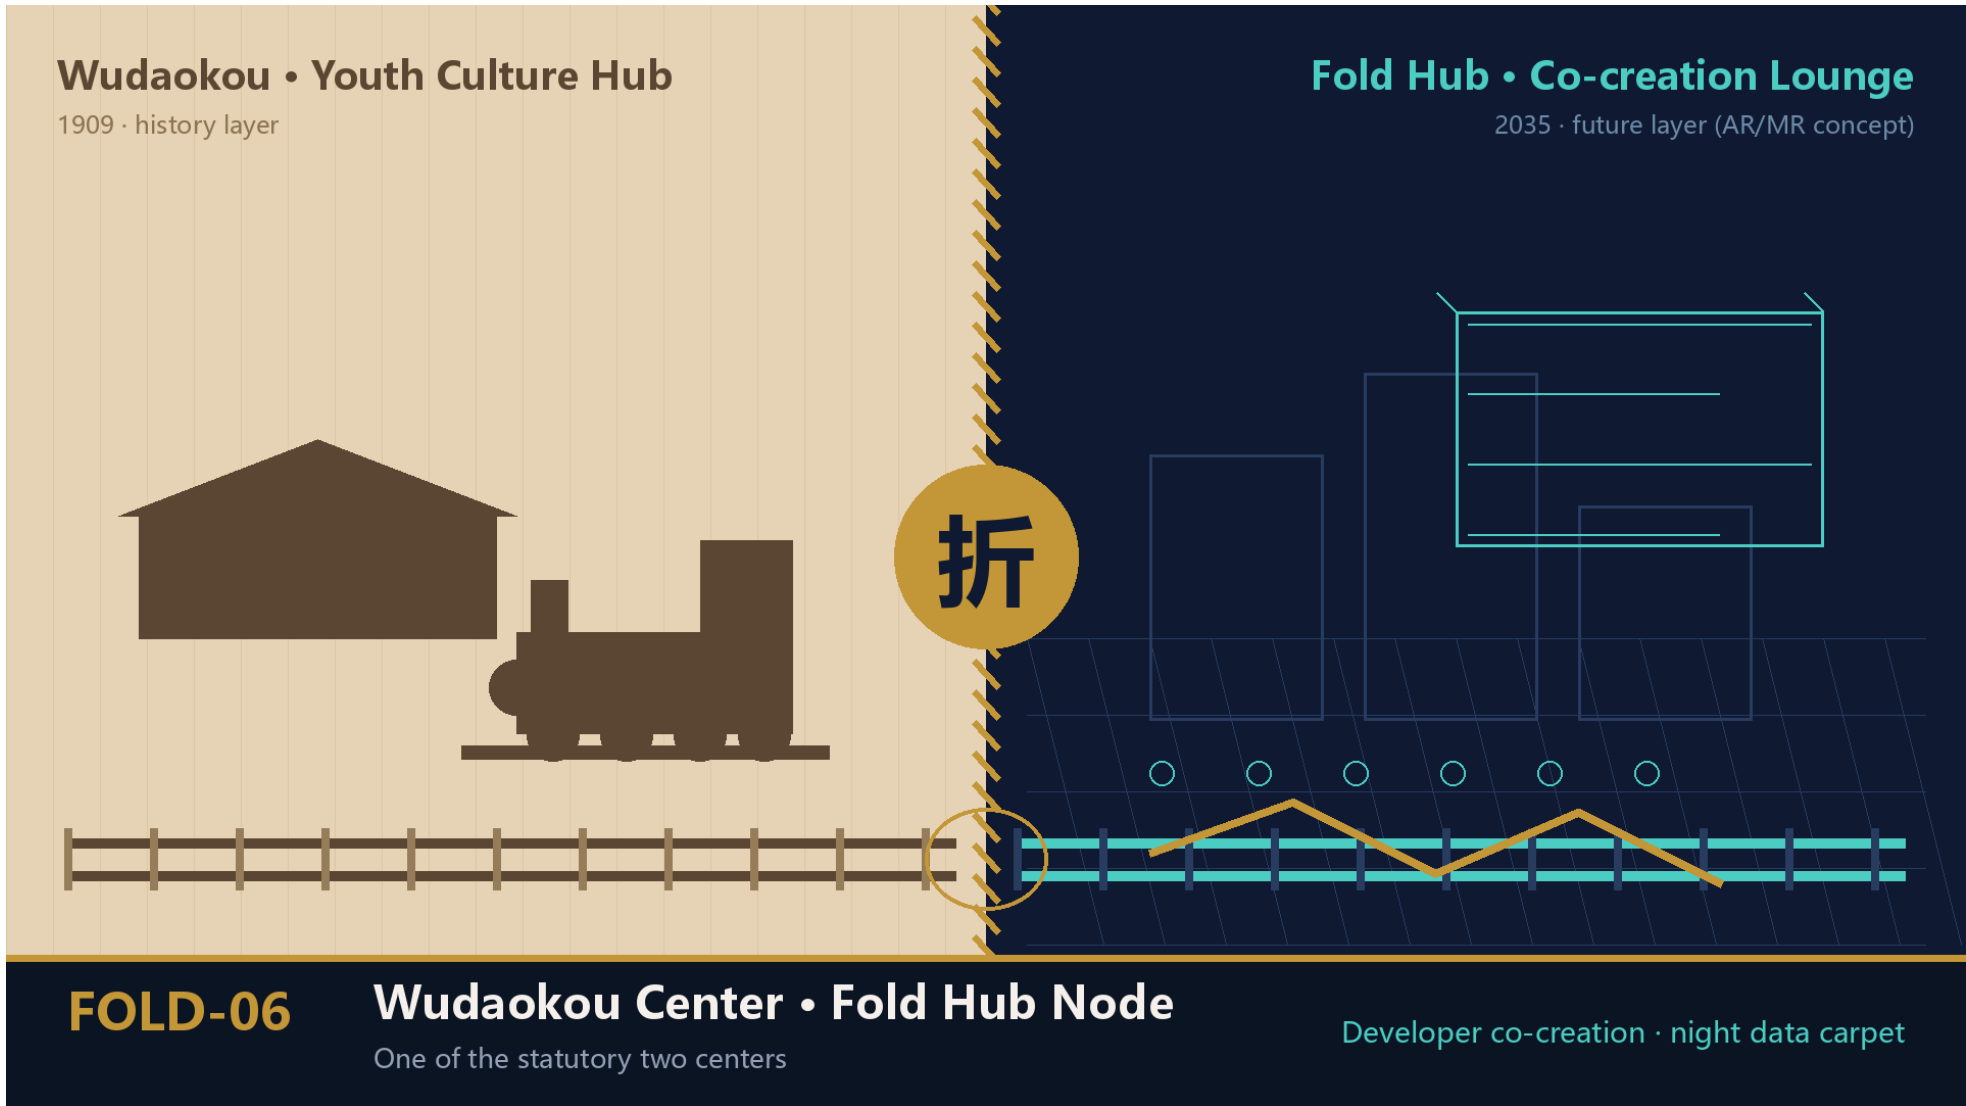

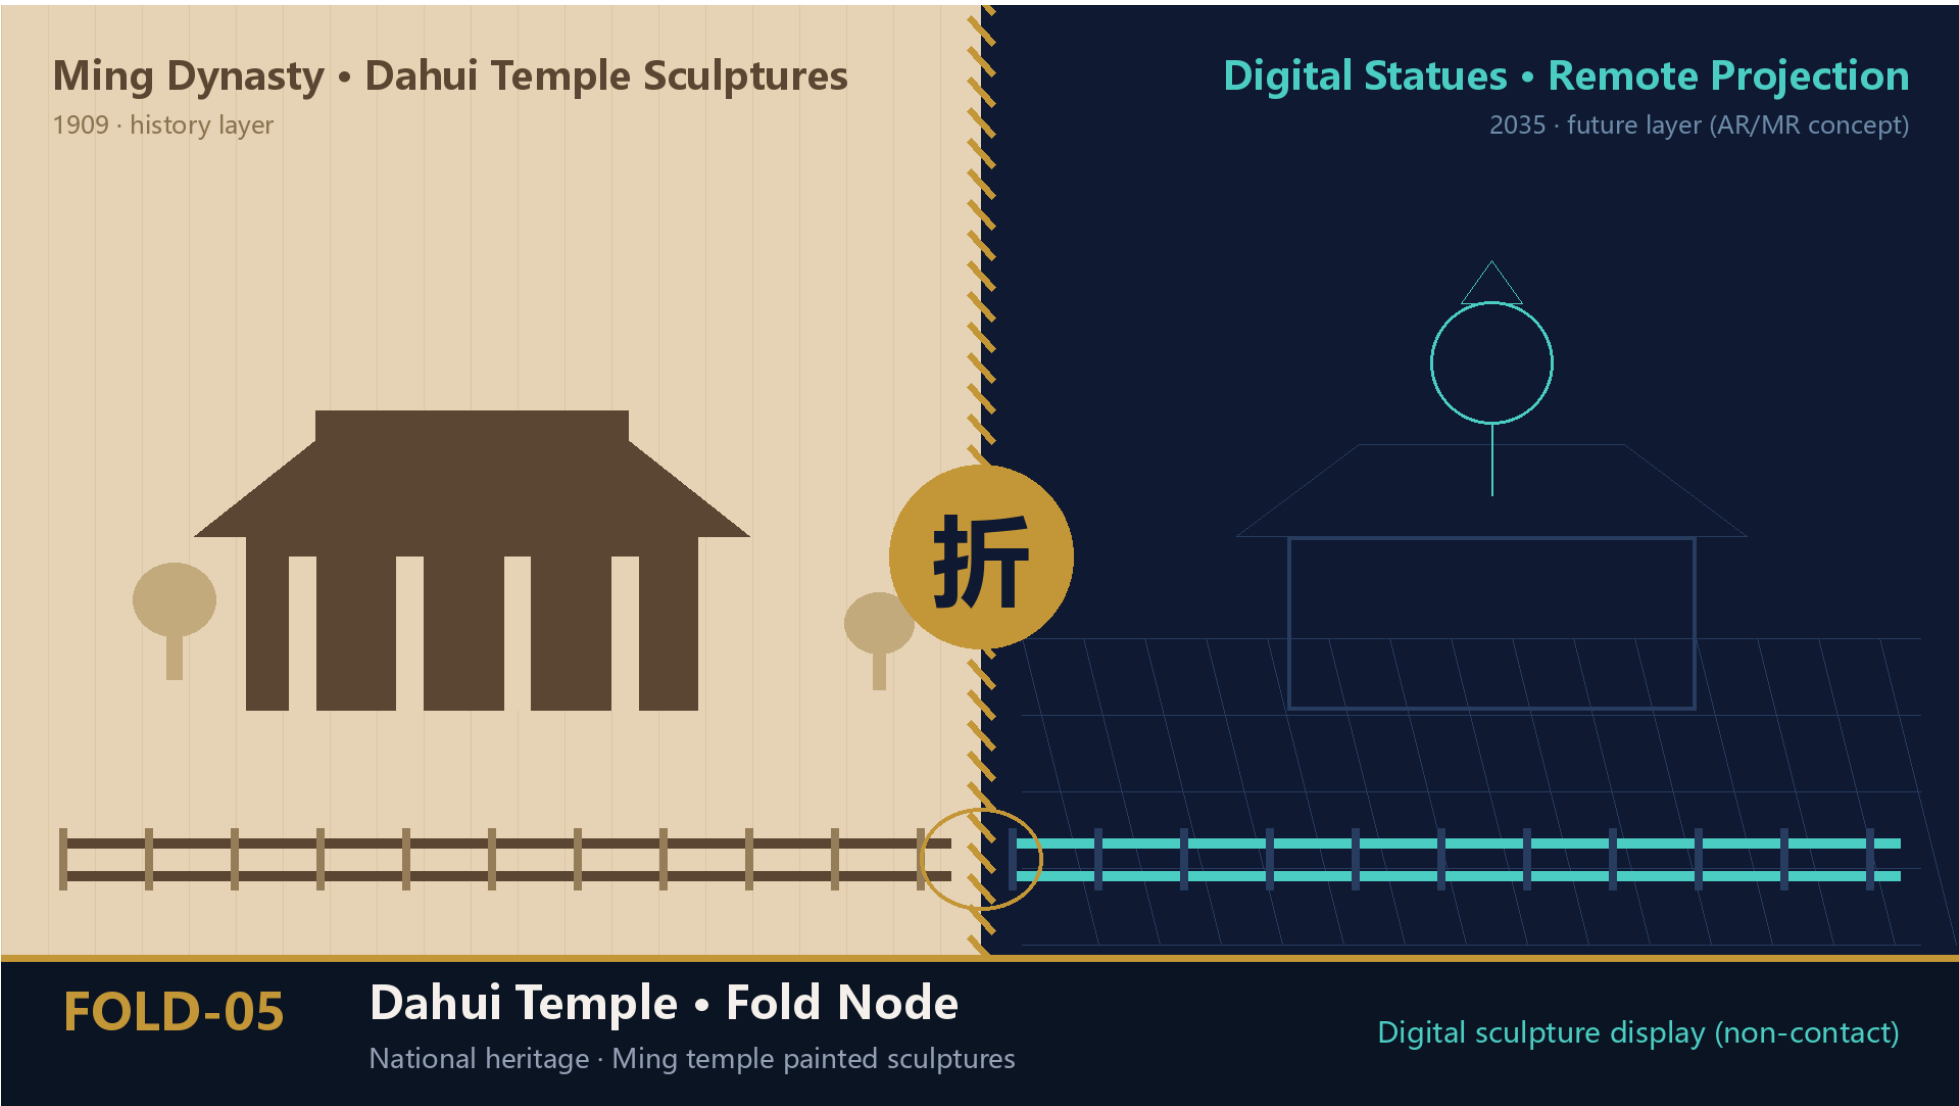

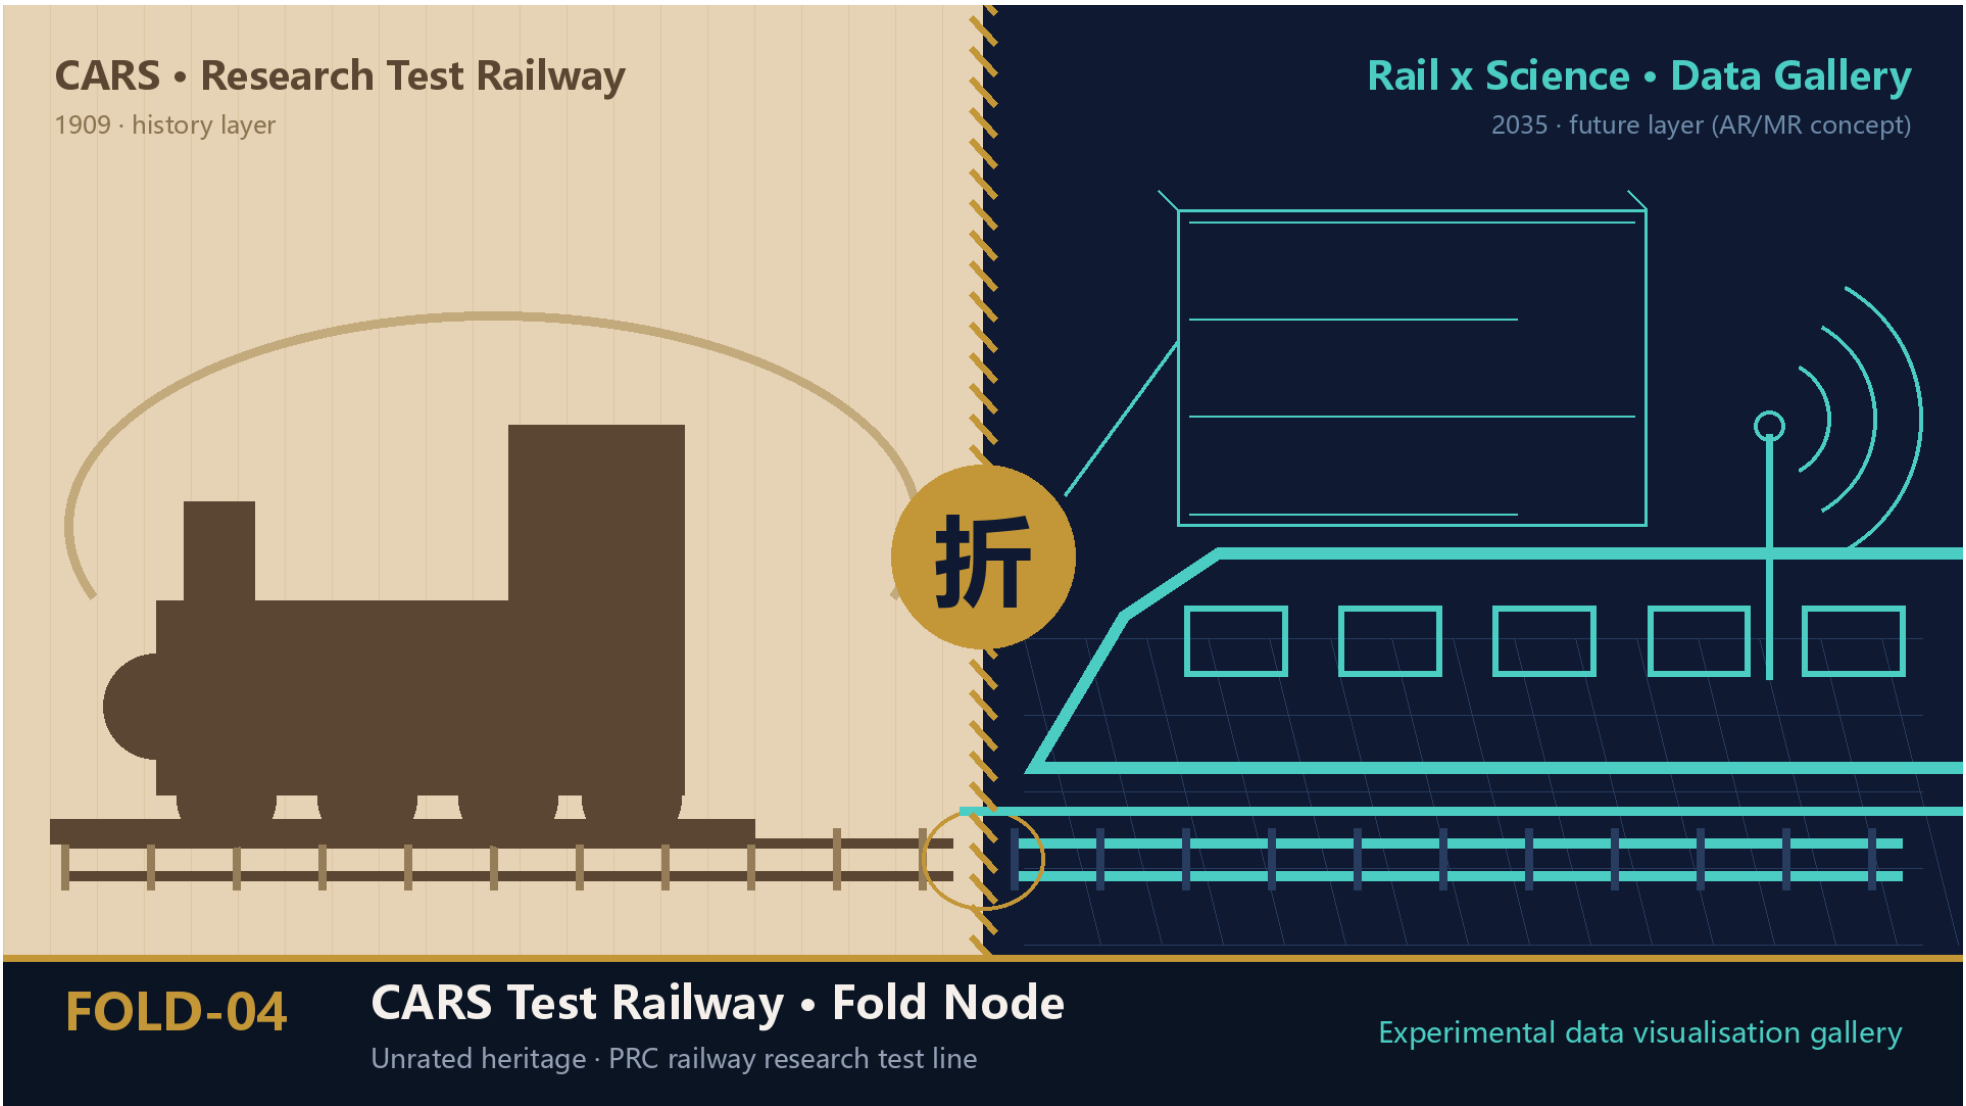

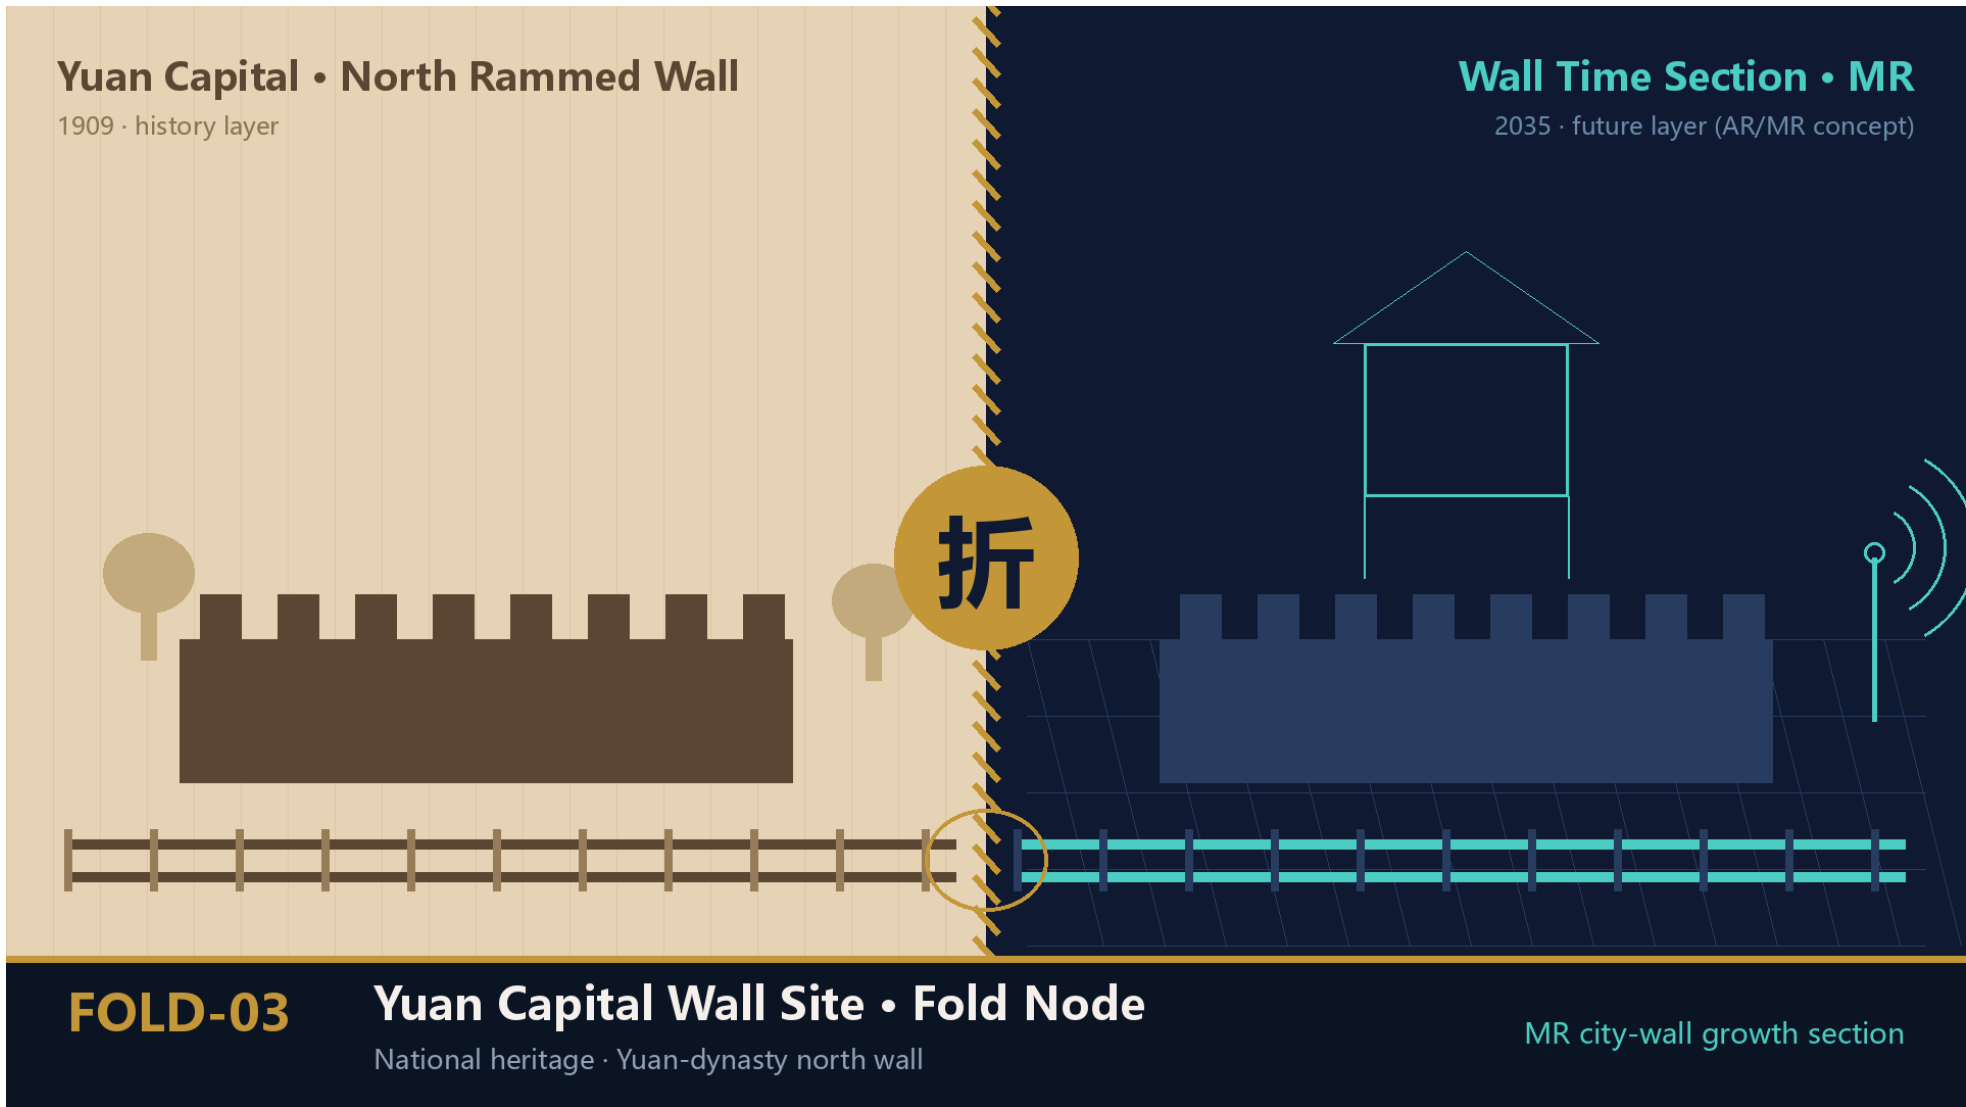

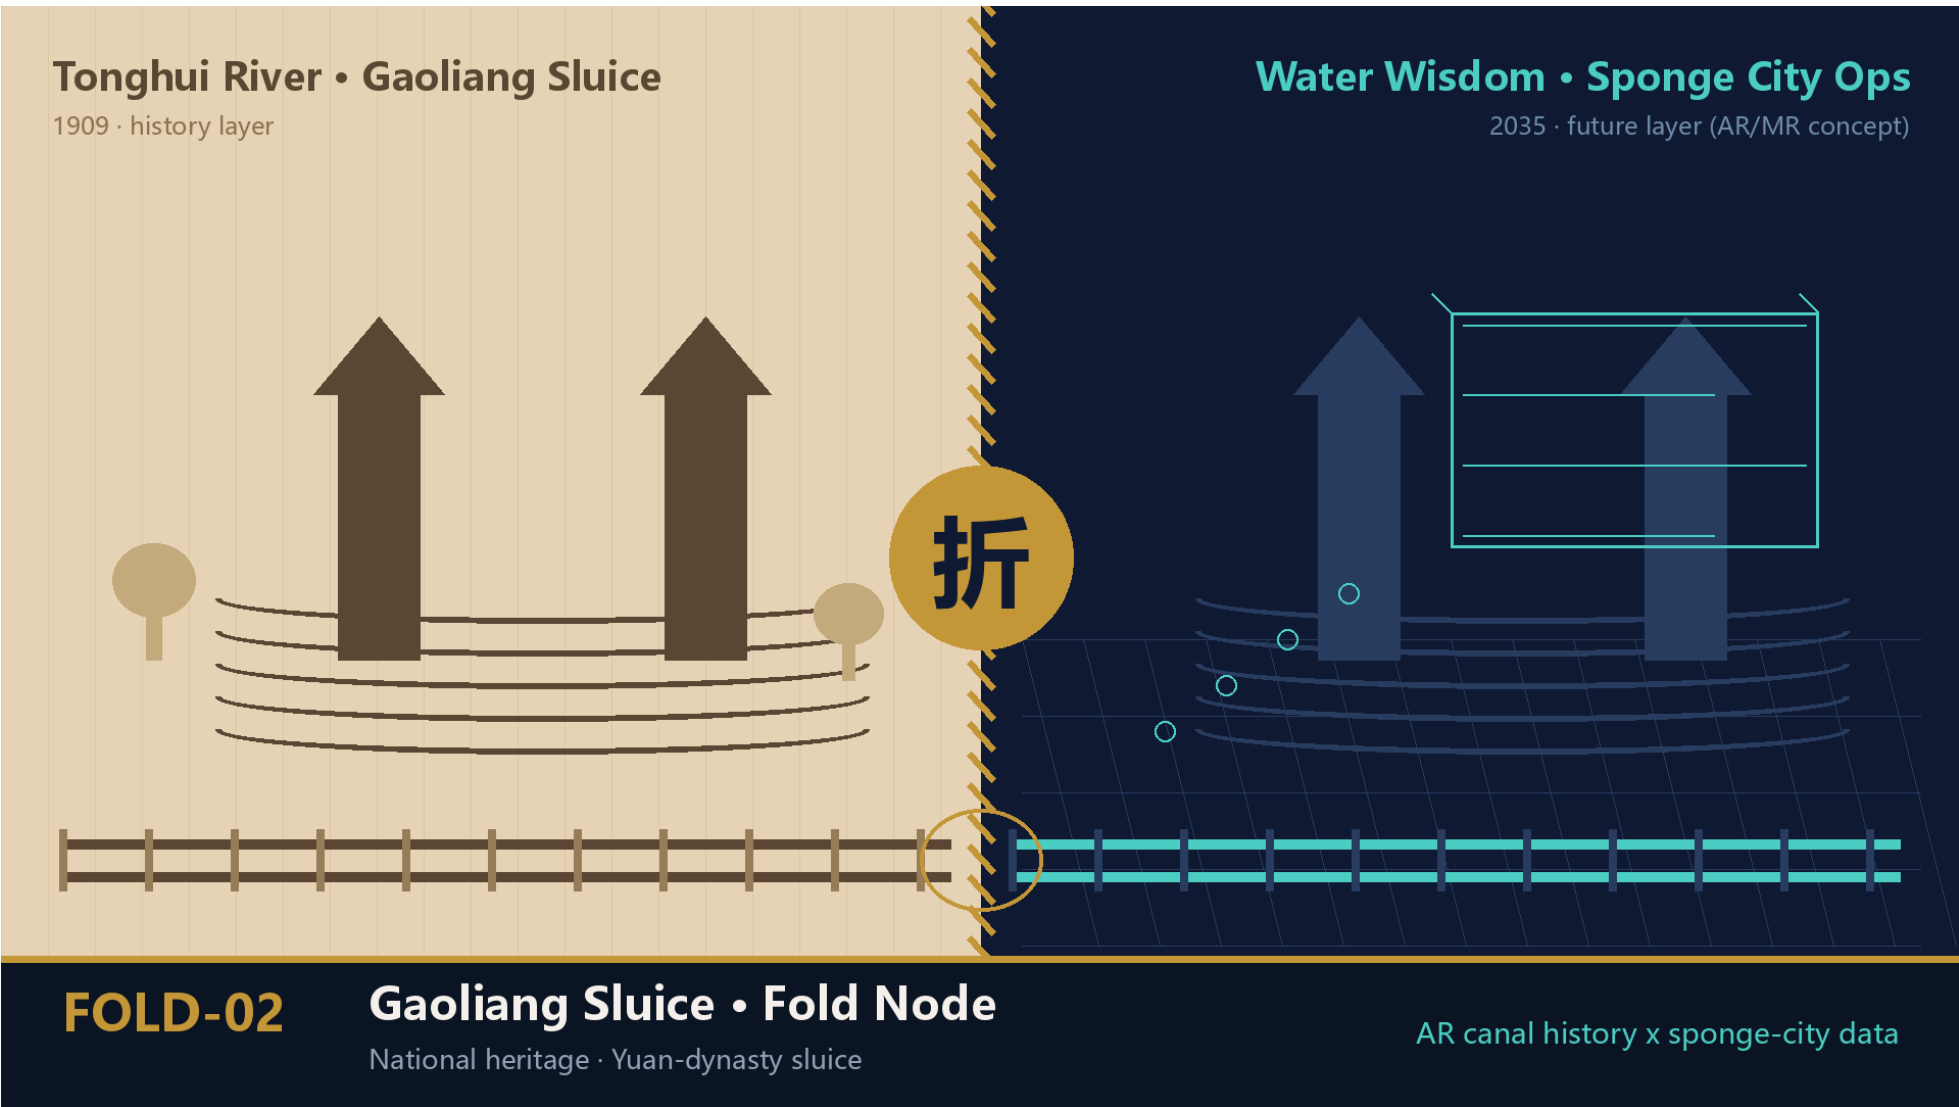

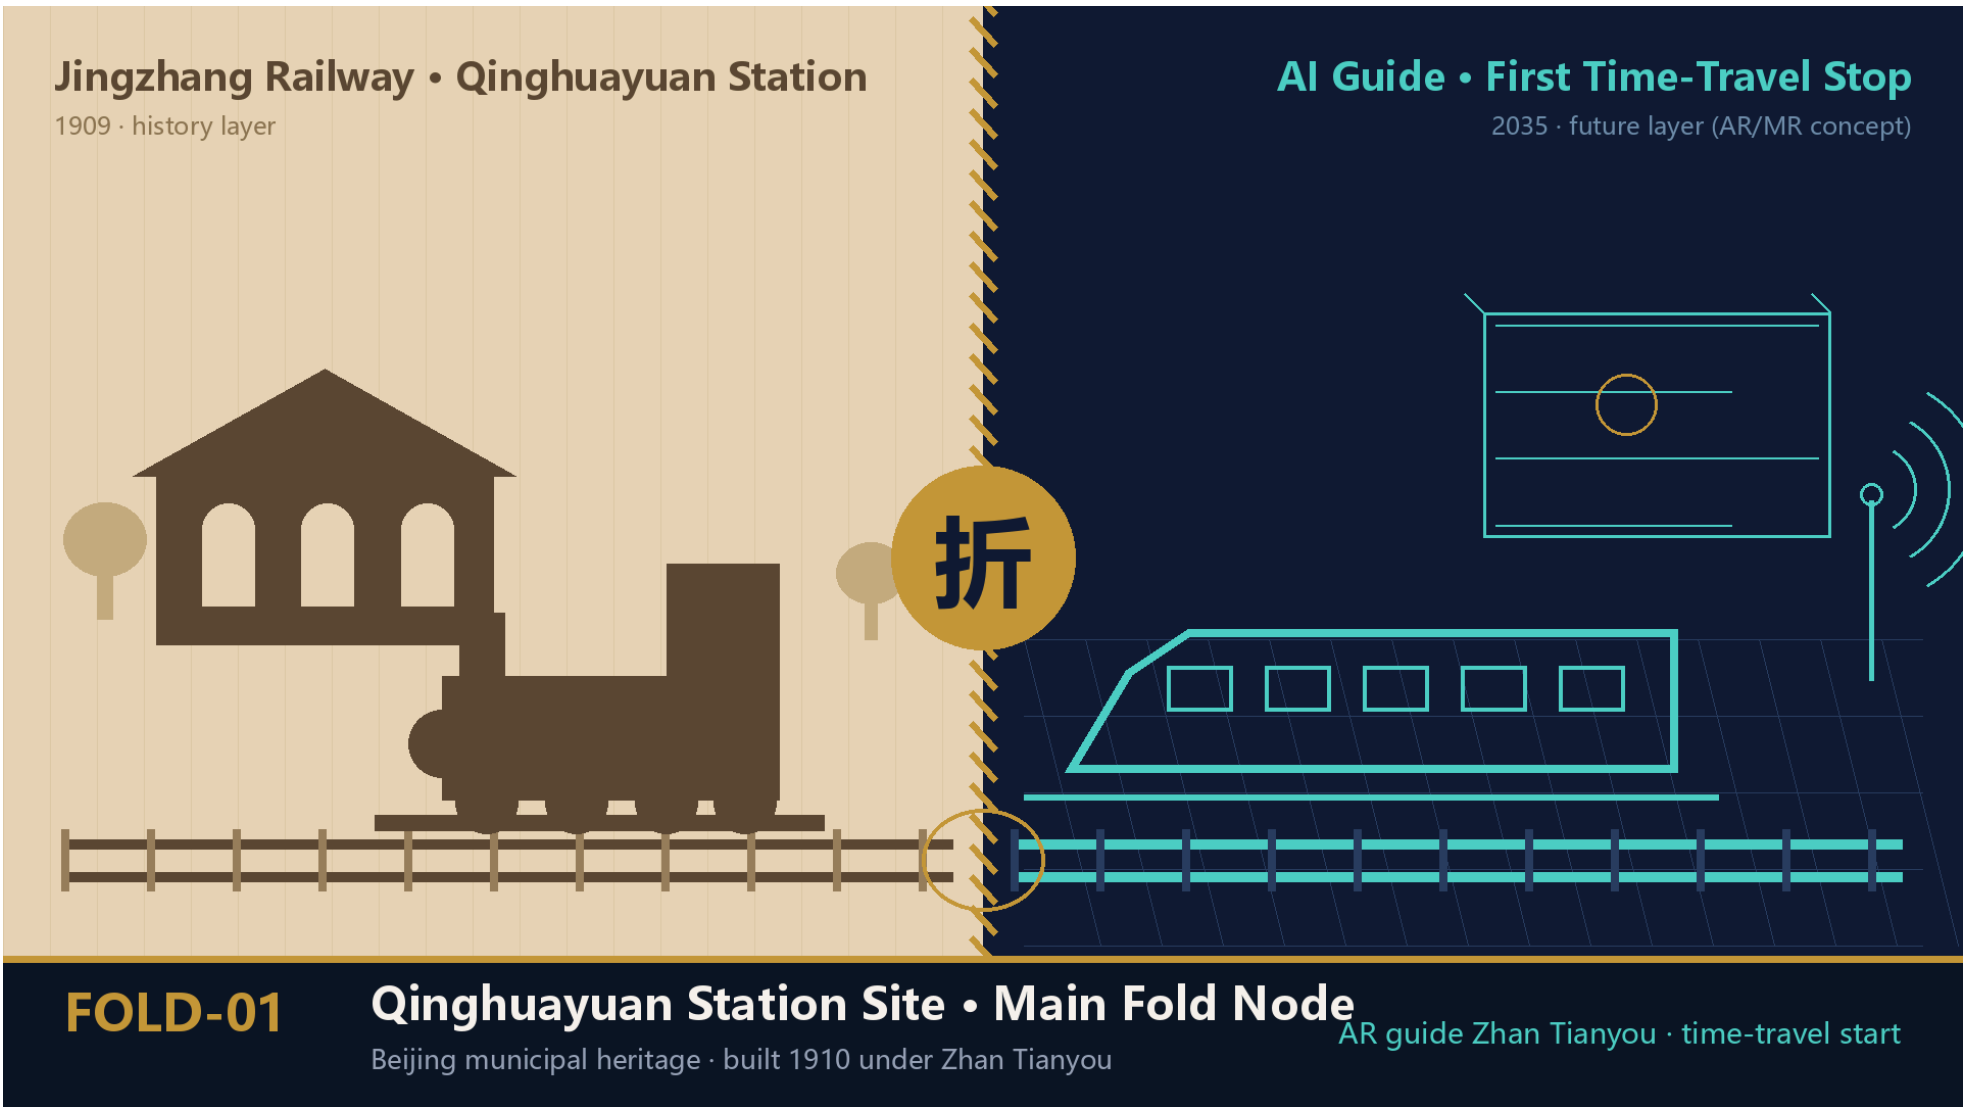

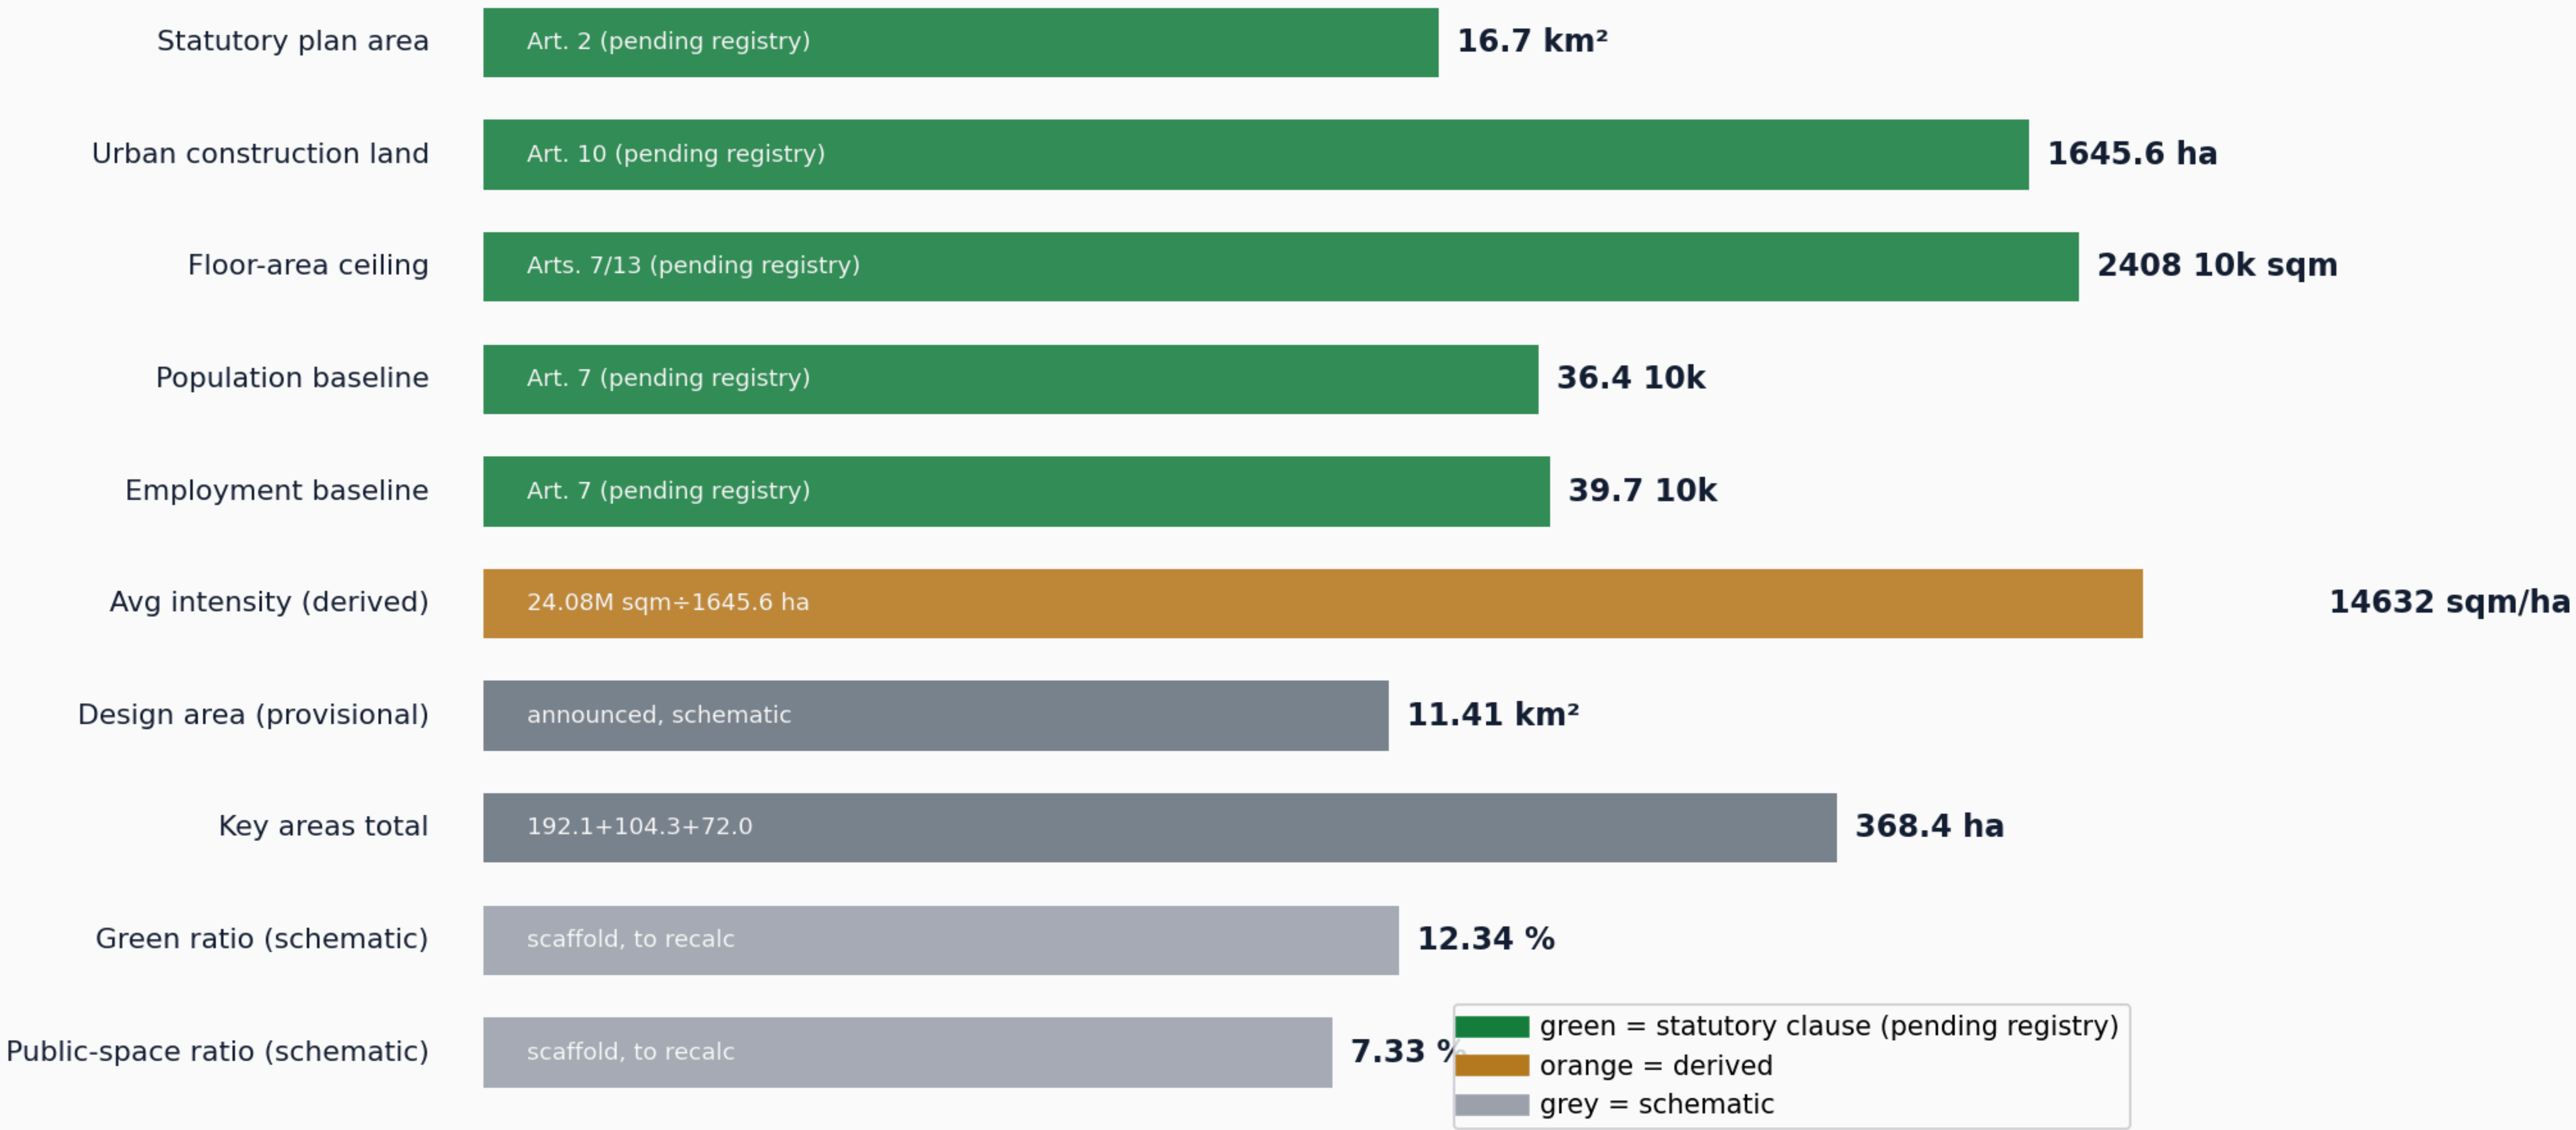

The 368.4 ha key-area total is the brief figure; ratios will be recalculated from geometry on official KEY_AREA release, with a version-change record.

3 Deployment gates

AI+06/09/10 pilots require a data/ethics impact assessment, participatory accessibility testing, safety validation, public notice and professional sign-off.
